

# 3 Seconds to Clean Water

1. Open it

2. Drop it in

3. Clean water

## BluTab™

### Waterline Maintenance Tablets

#### Clean Water for the Busy Dental Office

Simply drop an effervescent tablet in your independent water bottle each time you refill it. It is just that simple! BluTab does the work for you. Effective waterline maintenance takes only seconds per day.

#### Economical

BluTab is effective for up to 28 days, so you can use it until it's gone. There is no need to purge lines at the end of the day. BluTab stays in your waterlines to maintain your water system.

#### Safe for Patients & Staff

BluTab is specifically formulated to be continuously present in your waterlines. Each tablet contains super low concentrations of non-toxic ingredients, so it is safe for your patients, your team and your equipment. BluTab is also odorless and tasteless.

#### Bonding

BluTab has no effect on bonding system strengths. \*Testing has shown that there is no statistical difference between bond strengths of enamel or dentin samples whether using distilled water or BluTab solution.

\*University of Detroit Mercy School of Dentistry, Waterline Treatment Affect on Enamel and Dentin Bonding to Composite, October 2005
